Profile

Junior Software Developer with experience delivering front-end, full-stack, and testing solutions across financial services and technology environments. Skilled in React, Spring Boot, Java, Python, and mobile application development, with experience building scalable applications, integrating APIs, and working throughout the software development lifecycle. Passionate about developing high-quality software, solving complex problems, and continuously expanding technical expertise.

Education

Computer Science (BSc) at Sheffield Hallam University

- Recipient of the Sports Performance Scholarship for national-level achievement in trampolining.

A-Levels at West Bridgeford School 2020 - Maths (A), Physics (B), Art (A)

Work Experience

Software Engineering Consultant at FDM Group, Leeds, Sep 2025 – Present

Software engineering consultant with experience delivering front-end, full-stack, testing, and AI-driven solutions across financial services and technology clients. Developed expertise in Java, Spring Boot, React, Python, Agile delivery, and ISTQB-aligned testing through client engagements and internal innovation projects.

Junior Front-End Developer at HSBC (Via FDM Group)

- Developed and enhanced React-based user interfaces for internal banking applications, improving usability, maintainability, and overall user experience.
- Executed manual testing throughout development cycles, designing test cases, identifying defects, and validating fixes against business requirements.
- Applied ISTQB testing principles including test design techniques, defect lifecycle management, and regression testing.
- Collaborated with developers, testers, and business stakeholders during sprint reviews and release activities to ensure high-quality delivery.
- Supported REST API integration and end-to-end validation activities, ensuring application functionality aligned with business and technical requirements.

Highlights: React.js, Spring Boot, REST APIs, Jira, Agile, Waterfall, ISTQB.

Junior Full-Stack Developer at NET Company (Via FDM Group)

- Developed and maintained full-stack features using React and Spring Boot, supporting secure and scalable internal applications.
- Designed and integrated REST APIs and MySQL database components to enable efficient data exchange across systems.
- Collaborated closely with cloud and AI teams to support feature delivery and cross-functional technical initiatives.
- Facilitated sprint reviews and quality assurance activities, helping identify defects early and ensuring features met functional requirements prior to release.
- Participated in code reviews, backlog refinement, and Agile ceremonies to support continuous improvement and team delivery.

Highlights: React.js, Spring Boot, MySQL, Docker, GitHub, Trello, REST APIs, Scrum.

Software Developer Internship at TechNest Solutions, Dubai, May 2025 – Aug 2025

- Developed and deployed a customer facing web application using React.js, Node.js, and MongoDB.
- Collaborated in a 5-person Agile team, participating in daily stand ups, sprint planning, and code reviews, ensuring delivery of features on time and aligning with business needs.
- Implemented RESTful APIs for internal tools, improving data synchronisation between systems.
- Contributed to unit and integration testing with Jest and Mocha, raising overall code coverage to 85%.

Software Engineering Internship at NFF, Tokyo, Jun 2024 – Jul 2024

- Redesigned the artist portal UI with React.js and Figma, improving artwork discoverability and mobile responsiveness, increasing user session duration by 30% and reducing bounce rate by 24%.
- Developed a custom ticketing platform with React + Node.js, integrating Discord APIs and lightweight AI tools to analyse support requests, identify trends, and reduce manual response overhead.
- Engineered workflow enhancements by customizing an open-source GitHub tool, adding media version control, real time translation, and timeline tracking, streamlining cross cultural team collaboration.

Key Projects

Chesterfield Royal Hospital Navigation System (First-Class)

- Led development of a React.js app providing GPS-style navigation, video walkthroughs, and detailed maps via QR codes.
- Delivered scalable backend features enabling staff to easily update routes and content.
- Received highly positive stakeholder feedback, with strong potential for real-world implementation.

Highlights: React.js, Node.js, REST APIs, Agile Scrum, Sprints, GitHub

Online Library Management System (Upper Second-Class)

- Directed development of a full-stack Laravel application supporting media rental and PayPal-based payments.
- Implemented secure authentication, authorisation, and encryption following SDLC best practices.
- Designed robust database architecture with PhpMyAdmin for reliable data handling.

Highlights: Laravel, PHP, MySQL, phpMyAdmin, PayPal API, Authentication & Security, Agile Scrum, GitHub

Sports-Focused Social Media App (First-Class, Ongoing Project)

- Developed a mobile application using Flutter and Kotlin, applying MVVM architecture and Firebase for authentication, real-time messaging, and dynamic content feeds.
- Implemented core social features including follows, likes, comments, and personalised feeds using user interaction data.
- Integrated REST APIs and optimised performance, with ongoing development towards app store release.

Highlights: Flutter, Kotlin, Firebase, MVVM, REST APIs, Real-Time Systems

AI-Powered Image Caption Generator (*Upper Second-Class*)

- Developed a Python TensorFlow model using the Flickr8k dataset to generate natural descriptions of images.
- Achieved average of 0.6 BLEU score using encoder-decoder architecture, validating training approach effectiveness.
Highlights: Python, TensorFlow, NumPy, Pandas, Deep Learning Pipelines

Extra-Curricular Achievements

- **Competitive Trampoline:** Compete British Championships (Ranked 12th nationally) – demonstrating discipline and perseverance.
- **Fitness & Strength Training:** Regular gym training focused on discipline and goal setting.
- **Duke Of Edinburgh (Bronze + Silver):** Developed leadership, teamwork, and problem-solving skills through challenging expeditions.
- **Languages:** Fluent in Arabic (multiple dialects).

Technical Skills:

Languages & Programming: Java, Python, C++, C#, Dart, JavaScript, PHP
Web Development: React.js, Vue.js, Laravel, HTML, CSS, REST APIs, Node.js, MVC, MVVM
Mobile Development: Flutter (MVVM), Kotlin, Firebase (Auth, Realtime DB, Firestore, Cloud Messaging)
Database Technologies: MySQL, SQLite, phpMyAdmin, Firebase, MongoDB
AI & ML: TensorFlow, NumPy, Pandas – image captioning, deep learning pipelines
Tools & Workflow: Git, GitHub, VS Code, Android Studio, Figma, MockPlus, Jest, Mocha, Docker
Practices: Agile (Scrum/Kanban), CI/CD basics, project coordination, team collaboration, Trello, Jira, Sprints.
Testing: Manual Testing, Test Case Design, Defect Identification, Regression Testing, UAT, ISTQB Principles
